Estimate for Brick Masonry on Town of Windsor Building

1. Brick replacement of decayed or cracked brick. I would recommend replacing an agreed upon # of bricks prior to starting the project.
 - The brick will be cut out to a full bed depth, clean old mortar out and replace with new brick to match as closely as possible. The cost of brick replacement will be \$32.00 per unit.
2. I would recommend the brick repointing be done to both bed and the head joints to a minimum depth of 1". Our cutting blades cut to a depth 1.25" thus with new grout will be the same depth. The cost per square foot for the repointing would be \$26.00

Hello Liz,

I will get an estimate out tonight so that you will have it for tomorrow. Thanks for the reminder!

Hello Eric,

I was wondering if you would have an estimate together by 11/9 for our next board meeting that I can present to the board? Please let me know, thank you.

Eric,

Attached are the bid information and the scope of work we are looking for. You can contact myself or our building inspector Rich Osborne to schedule a time to look at it, Rich is very knowledgeable of what needs to be done but I can help you if the times do not work out for the two of you.

Thank you,
