In addition, applicant has supplied confirmation that the project's final engineering design has been approved by the Broome County Department of Health. Supplemental materials submitted by the applicant included an updated statement by applicant confirming the project site plan will be amended to conform with Town of Windsor Code (Code) §64-22 requirements that individual camper sites have a minimum size of 2,500 square feet; and
- B. The Town Planning Board, having considered the application complete and in conformance with the commercial site plan requirements of the Code of the Town of Windsor (Code) §93.21.1, referred said application with its recommendation to the Town of Windsor Town Board pursuant to Code §93.21.1(B); and
- C. The Broome County Planning Department has reviewed the application pursuant to §239 (l), (m), and (n) of the New York State General Municipal Law; and
- D. In a letter dated December 20, 2023, the Broome County Planning Department determined that the proposed action will have no significant county-wide or inter-community impact; and

- E. Pursuant to the New York State Environmental Quality Review Act (“SEQRA”) and its implementing regulations at 6 NYCRR Part 617, the Town Board of the Town of Windsor has, on February 14, 2024, determined the project does not meet or exceed a threshold contained in the Type I list in section 617.4 and is not contained in the Type II list in section 617.5, and is therefore an unlisted action; and

1. Pursuant to Part 617 of the SEQRA implementing regulations, it has been determined by the Town Board that Applicant’s application constitutes an Unlisted Action as defined under said regulations. The Town Board having considered all applicable agency input and the possible environmental impacts of the action, hereby determines that Applicant’s site plan will not have a significant adverse impact on the environment, and is hereby adopting a negative declaration with respect to the same; and
2. The Town Board has reviewed this application relative to the considerations and criteria found in the Town Code, Chapter 93, specifically Articles IV (Agriculture District) and V (Commercial Site Plan Review) as well as Chapter 64 Sections 64-21 and 64-22 with respect to trailer campground licensing and requirements; and
3. The proposed use is compatible with current existing uses in this zoning district as this project is a modest expansion of an existing trailer campground and given the nature of the business and expected traffic at the site, the proposed project is not expected to negatively impact surrounding uses; and
4. The proposed use is compatible with adjoining properties and with the natural and manmade environment; and
5. Parking, vehicular circulation, and infrastructure for the proposed use is adequate provided the applicant adheres to the permitting and Town Code requirements for trailer campgrounds as set forth in Windsor Town Code, Chapter 64, Sections 64-21 and 64-22; and
6. The overall impact on the site and its surroundings considering the environmental, social and economic impacts of traffic, noise, dust, odors, release of harmful substances, solid waste disposal, glare, or any other nuisances has been considered and found to be

negligible, based on the expected volume of traffic associated with this project, and the project is not expected to generate excessive noise, dust, odors or release of harmful substances; and

7. The Town Board approves the sketch plan documents, submitted with the application and amended with supplemental submissions, as site plan for 280 NY-79, Windsor NY, tax parcel 232-01-22-112, conditioned on the following:
 - a. Applicant shall coordinate permitting with the Town of Windsor Code Enforcement Officer and ensure all project permitting obligations are met, and applicable permits obtained prior to the commencement of construction of the permitted action. Applicant further agrees to provide copies of all project permits to the Code Enforcement Officer on an ongoing basis, and
 - b. Applicant will advise the Code Enforcement Officer of any proposed changes or modifications of the Site Plan documents as approved, and agrees that any modifications deemed material by the Code Enforcement Officer may be subject to review and approval by the Town Planning Board and Town Board; and
 - c. Applicant shall comply with all applicable Town Code provisions and local laws including but not limited to property maintenance and noise control both during construction and operation of the proposed action; and
 - d. Applicant shall comply with all trailer campground and camp site licensing requirements set forth in Town of Windsor Code Chapter 64-MOBILE HOMES AND TRAILERS, specifically §64-21 and §64-22; and
 - e. Ingress and egress to and from the expanded campground and camp sites from NY-79 shall be limited solely to the private roadway and service roads contained wholly within the parcel; and
 - f. Applicant shall obtain a floodplain development permit as more fully set forth in Town of Windsor Code Chapter 51-FLOOD DAMAGE PREVENTION, Article IV-§51-13; and
 - g. Up to and including the date that work is complete and final stabilization of the graded soil is achieved, applicant shall, as necessary, utilize all appropriate erosion control measures including, but not limited to silt fencing and a concrete washout area as more fully set forth in the New York State Department of Environmental Conservation (NYDEC) New York State Standards and Specifications for Erosion and Sediment Control publication; and

- h. None of the expanded camp sites shall be occupied until applicant provides the Broome County Department of Health and the Town of Windsor Code Enforcement officer with the following:
 - 1. Final engineer inspection of the on-site septic system placed according to the submitted site plans,
 - 2. Final engineer’s inspection of the proposed water well and submittal of all testing requirements pursuant to NYS Sanitary Code Part 5,
 - 3. Certificate of approval provided by a qualified electrical inspector for the installation of electrical service, wiring and fixtures as set forth on the submitted site plans; and
 - i. No subsequent phases or further expansion of the Pine Crest Campground shall be undertaken without applicant’s submission of a new site plan application subject to all relevant procedures, reviews and legal requirements set forth in the Town Code, and all applicable federal, state and local law and regulations.
8. The Town Board, finding that the applicant is in compliance with all other provisions of the Code and other applicable ordinances, approves this Site Plan for an expansion of a trailer campground at a retail business at 280 NY-79, Windsor NY, tax parcel 232-01-22-112 subject to the conditions set forth herein.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Project :

Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency’s reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
