Yes I'm sure they do...and it's a nysdec364 online we can register the highway 10wheeler and now do it every 5 years or so and just pay tipping fees

Wow! That is really nice to work with people that care about what they do and put in the extra effort for a customer. I would get Mike Kithcart the info on certifying a truck and he can look into what needs to be done that would be awesome and save some \$\$\$. I know the Sewer District residents would appreciate it I am sure, I know they love to complain about making their quarterly payments.

Thank you for getting it done. It will help out the town for years. Also we can possibly look into getting one of our trucks classified so we can do our own haul out in the future.

Also they did a nice job cleaning up all of the yard and put down straw and grass seed.

Good morning Liz,
Well the project wrapped up without any damage and everything looks great and is working in perfect order like it was new.
The contractor put down hydraulic cement in the openings of the reed beds where we had those new flood gates installed 2 years ago. We started pumping to it 2 weeks ago. Over all very satisfied with the reed bed clean out and looking forward for the utilization for years to come.

Hi Donnie,

Do you have an update for the Board on the sludge removal project? Or anything else you would like to let the Board know about?

I'll be away the beginning of next week so I am trying to get info together for next Wednesdays meeting.

Thanks,
